

Need high performing rigid media for indoor and outdoor signage?

With Tango®, InSite® Reveal® and Infinity® from Ariva®, not only do you get great performing products from WestRock and Gilman Brothers, all three provide a common white point so managing colour across multiple platforms is assured.

The Gilman Brothers' ColorOne system ensures optimum printing performance and consistency across all direct-printable foam board and specialty graphics boards by harmonizing their degree of whiteness.

WestRock Tango maintains the clean-white shade your customers prefer; regardless of size, grade, caliper or press. That means truer colours, sharper contrasts and cleaner backgrounds for every print job—and greater consistency for the brand.

Ariva has the right product for each application.

InSite Reveal

PAPER-FACED GENERAL PURPOSE FOAM BOARD

InSite Reveal's proprietary foam centre cuts cleaner and faster on digital cutting/routing equipment like ZÜND®.

W/W/W

THICKNESS	SIZES	SHEETS/CARTON
3/16"	48" X 96"	25

Infinity Board

STYRENE-FACED HIGH PERFORMANCE FOAM BOARD

Infinity is a 100% styrene, bendable board that can be **printed, shipped flat, then cold bent to set up into a 3D presentation.** It can even be wrapped around a pole! You can't do that with fluted polypropylene.

W/W/W

THICKNESS	SIZES	SHEETS/CARTON
3/16"	48" X 96"	16
1/2"	48" X 96"	12

Tango

For making great impressions in signage, point-of-sale display, banner and posters Tango is the preferred choice. Engineered for optimum results on a broad range of U.V. and latex inkjet printers.

C1S
