

## WHEN SHOULD YOU APPLY AN OVER-LAMINATE TO WIDE FORMAT GRAPHICS?

Marabu's Clear Shield liquid over-laminate is a water-based liquid coating for **enhanced UV-protection**, providing **chemical and abrasion resistance** for most non-water sensitive wide format substrates printed with **solvent/eco solvent inks**.

### CLEAR SHIELD CLASSIC

Clear Shield Classic is perfect for vinyl, polyester and polypropylene banners. It is suitable for vertical applications and can easily be applied with a brush or roller.

#### Interested in saving \$130/roll\*?

Compare to conventional PVC over-laminates and the choice is clear:

- One roll of PVC over-laminate covers about 675 square feet of printed material. Cost: \$0.35/SqFt
- One gallon of Marabu's Clear Shield Classic liquid laminate covers the same 675 square feet. Cost: \$0.15/SqFt (saving \$135/roll!)

Apply Clear Shield Classic by hand using a brush or short-napped roller. For best results apply two coats and allow for drying time in between each application.

#### Would you consider yourself a high volume over-laminate user?

If yes, then applying Marabu's StarLam liquid laminator could pay for itself in less than one year and save you \$7,000+ annually.

For a limited time purchase one gallon of Clear Shield Classic liquid laminate and we will include the short napped roller and tray for easy application.
