### **QUESTIONS TO ASK?**

- How long do you want the label to last?
- What type of surface will the label be adhered to? (Plastic, metal, etc.)
- Is the application designed to be permanent or removable?
- Will the label be used outdoors? If yes, will it be applied at room temperature or outside?

**It is best to test any application, have you called Ariva for samples?**

### **ADHESIVE GUIDE**

#### **PERMANENT**

Permanent is an UV resistant acrylic emulsion exhibiting a high initial tack. It will bond to a variety of difficult surfaces including Tyvek, most corrugates, fibre drums, polypropylenes and other plastics. Its patented non-ooze characteristics will clean kiss, die, and guillotine cut. For application temperatures about 25°F. Maximum end-use temperature range -65°F - 180°F after a 24 hour dwell on substrate before exposure.

#### **REMOVABLE**

Removable is an acrylic emulsion with good quick stick to most surfaces. It is UV resistant with good solvent resistance. For application temperatures about 25°F. Maximum end-use temperature range -65°F - 180°F after a 24 hour dwell on substrate before exposure.

---

## **ADHESIVE GUIDE Continued**

### **PERMANENT ACRYLIC**

Good quick stick to most surfaces. UV resistant, non-yellowing. Super clear, good for clear films. Excellent ultimate adhesion to most surfaces. Suggested for most PVC surfaces. Resistant to most solvents. For application temperatures above 25°F. Maximum end-use temperatures of 150°F on soft vinyl, 200°F on hard vinyl and polyesters. For long-term inside/outside usage for labels, signs, stickers, etc. Adheres well to most surfaces, including PVC.

### **REMOVABLE ACRYLIC**

Non-staining. Good quick stick to most surfaces. UV resistant, non-yellowing. Excellent removability from most surfaces. Resistant to most solvents. For application temperatures above 25°F. Maximum end-use temperatures of 180°F. Long term inside/outside usage (but removable for limited life requirements). Adheres well to most surfaces, including PVC.

### **SPECIAL BADGE**

Badge adhesive is specifically designed for short term use on fabric. It is non-staining, removes cleanly and exhibits good holding power on cloth. CAUTION: Badge adhesive is not recommended for fur, leather, suede, sequins, corduroy or silk. This is a permanent-type adhesive and should not be used where long term removability is required - applications such as sock and tights bands or size labels. Temporary lapel name badges. Novelty stickers.

### **SPECIAL REMOVABLE**

Special Removable is an UV resistant acrylic emulsion. Characterized by moderate tack, MR861 will bond and cleanly remove from a wide variety of surfaces such as wood, painted drywall, wall coverings and plastic. For application temperatures about 45°F. Maximum end-use temperature range -65° -150°F after a 24 hour dwell on substrate before exposure.
